

**MANUAL CUTTER-SAW CUTTER FOR ALU Ø 50**

Article N° 1 147

Supplier : **MEP**  
Type : **COBRA 352 SX EVO**

State of the article : **6.0 New**

Number :

COBRA 352 SX evo chainsaw, semi-automatic, electro-pneumatic, for cutting aluminum and light alloys, with hard metal (HM) electro-welded toothed end mill-saw.

- Machine for making cuts from 45 ° to the right to 45 ° to the left and with vertically tilting head for making cuts between 0 ° and 45 ° to the left.

- This machine is microprocessor-based with a controlled axis and represents the latest generation of MEP project controller designed exclusively for its own semi-automatic saws.

OPERATION: starting the cycle

commanded by a push-button results in the following operations: - closing of the vice and starting the engine - lowering the head to perform the cut - stopping the engine - returning the head - opening the vice.

- DOWN-UP CYCLE: by acting on the SEMIAUTOMATIC cycle, the DOWN push button stops the head and the rotation of the tape at the end of the cut while keeping the vice closed and complete the opening of the vice and the return at the top of the head among the UP push button.
